PROFESSIONAL SUMMARY

Data Analyst specializing in business intelligence and predictive analytics across agribusiness, fintech, and technology. Known for building analytics infrastructure from the ground up – at Cargill Ghana, delivered dashboards and data-driven recommendations that informed a strategic shift resulting in 40% revenue growth and over 50% cost reduction within the first year. Equally comfortable working with executive stakeholders and engineering teams, bridging the gap between raw data and decisions that move the business forward.

PROFESSIONAL EXPERIENCE

Data Analyst — *December 2023 – Present*
Cargill Ghana — Accra, Ghana

- Designed and maintain interactive Power BI and Tableau dashboards delivering real-time insights to senior stakeholders across finance, sustainability, and supply chain functions.

- Spearheaded an end-to-end analytics overhaul that directly informed a strategic pivot, driving a 40% revenue increase and cutting operational costs by over 50% within the first year.
- Partner with cross-functional teams to identify operational inefficiencies and model sustainability scenarios, translating findings into actionable recommendations.
- Led a company-wide data quality initiative, implementing automated validation and cleaning protocols that materially reduced data discrepancies and improved reporting accuracy.
- Identified reporting inefficiencies across multiple departments and built automated dashboard reports, significantly reducing manual reporting effort and improving decision-making speed across teams.

Real-Time Analyst
May 2023 – November 2023

Webhelp Ghana (Amazon UK Project)
Accra, Ghana

- Managed and optimised a queue of 2,000+ daily customer calls, sustaining a 98% service level consistency throughout the engagement.
- Built an automated real-time reporting system that reduced average response time by 20% and improved customer issue resolution rates.
- Developed live KPI dashboards for management, providing an instantaneous view of call centre health and enabling faster, evidence-based decision-making.
- Delivered demand forecasting insights that improved forecast accuracy by 15% within three months, reducing overstaffing and understaffing incidents.

Business Data Analyst
November 2020 – May 2023

Alster Technologies Limited
Accra, Ghana

- Analysed large-scale datasets to surface key performance metrics, customer trends, and improvement opportunities across software development processes.
- Built predictive models to forecast customer behaviour and optimise marketing campaigns, achieving a 15% increase in conversion rates.
- Conducted A/B testing and statistical analysis to evaluate new product features, directly influencing product roadmap prioritisation.
- Provided market research and data-backed recommendations that shaped business development strategy and informed new product investments.

Control & Monitoring Analyst
September 2019 – October 2020

Universal Merchant Bank
Accra, Ghana

- Led daily reconciliations of the bank's major accounts, ensuring full compliance with industry standards and internal audit requirements.
- Identified and resolved financial discrepancies exceeding $1M, preventing potential losses and strengthening internal controls.
- Prepared risk assessment reports and presented findings to senior management to support regulatory and operational decision-making.

VOLUNTEER EXPERIENCE

Product Owner (Volunteer)
November 2022 – August 2023

United States of Africa
Remote

- Led product discovery through market research and competitive analysis, aligning product features with validated customer needs.
- Managed the product backlog and sprint planning cycles to ensure consistent and timely feature delivery.

- Conducted user research and usability testing to validate product concepts and iterate on designs prior to release.
- Communicated product vision, progress, and key decisions to stakeholders and senior leadership.
